

Vienna, November 23rd, 2011

Dear Colleagues,

Last year's wonderful EMDR conference in Hamburg now lies behind us and we happily announce its successor, the **12th annual EMDR Europe Conference**, taking place in **Vienna**, Austria from **June 3rd to June 5th, 2011**.

There will be some very special aspects about the Vienna meeting: After many years of holding large conferences with numerous lectures and plenary sessions, we have chosen to have a smaller conference this time, consisting of only a few focused key note speakers and specialized, **in-depth workshops** dealing with specific applications, special target groups and the experimental use of EMDR.

However, this means that it is not possible to provide unlimited registration numbers. In past years, we generally welcomed 600-800 participants. This year, **registration will be limited to 400 persons** – and we therefore recommend an early Registration.

You are cordially invited to join us at the conference. We are very much looking forward to seeing you in Vienna! For more detailed information and registration please see our **conference website** <http://www.emdr2011.eu>, which will be continually updated throughout the coming months.

In **attachment** you will find the varied **scientific program**.

If you have already decided to participate and want to secure one of the limited places, we offer you the opportunity to **pre-register**. Just **send us your interest to emdr2011@emdr-netzwerk.at**. You will be included in the list of participants and asked to enter your exact dates as soon as the registration is open, concrete schedule is ready and you can exactly choose your workshops.

And for now: "Servus" from Vienna!

Udi Oren (President EMDR Europe) and **Eva Muenker-Kramer** (President EMDR Netzwerk Oesterreich), in the name of the scientific and the organizational committees
